The Architecture Centre - a little bit about us & our shop...

The Architecture Centre is for everyone, not just architects. Our public exhibitions, events, education and outreach programmes are about helping everyone understand the processes involved in creating the built environment. By built environment, we mean streets, parks, buildings, bridges; basically everything in our landscape that is built by humans. The more we all understand how the built environment works, the more we can form our own opinions about what we like, what we don't like, what we want our spaces to be and how we can get involved in the process. The Architecture Centre is here to help make this happen.

Our shop strives to source from companies that are ethically responsible and support human rights, environmental sustainability and animal welfare. All profits go towards our programmes and goals.

Spice - Mixed and mulled work

Exhibition: 27 November - 21 December 2007
